Collaboration & Teamwork

Profile

I am an Ambivert. I strive to do what I call my best in everything I do. I have good working experience. In every job that I have held, I have never let my employer nor my teammates and colleagues down. Its all due to my progressive nature, willingness to learn and be a team player kind of character that I always cultivate in all aspects of my work.

Although it may seemed that I have only experience working in BackEnd, but during my free time I love designing. Currently I'm self picking up Three.JS and Blender 3D to revamp my Portfolio into a 3D responsive web.
PS: Still working on it not yet published.
